

# Task 7: Identify and Remove Suspicious Browser Extensions

**Objective:** Learn to spot and remove potentially harmful browser extensions.

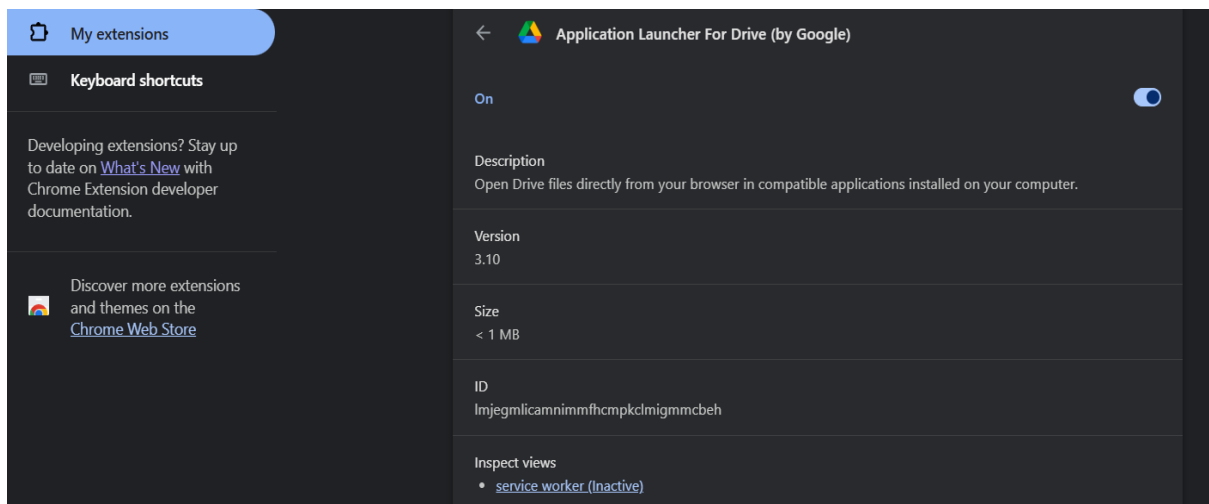

**Tools:** Any web browser (Chrome, Firefox)

**Deliverables:** List of suspicious extensions found and removed (if any)

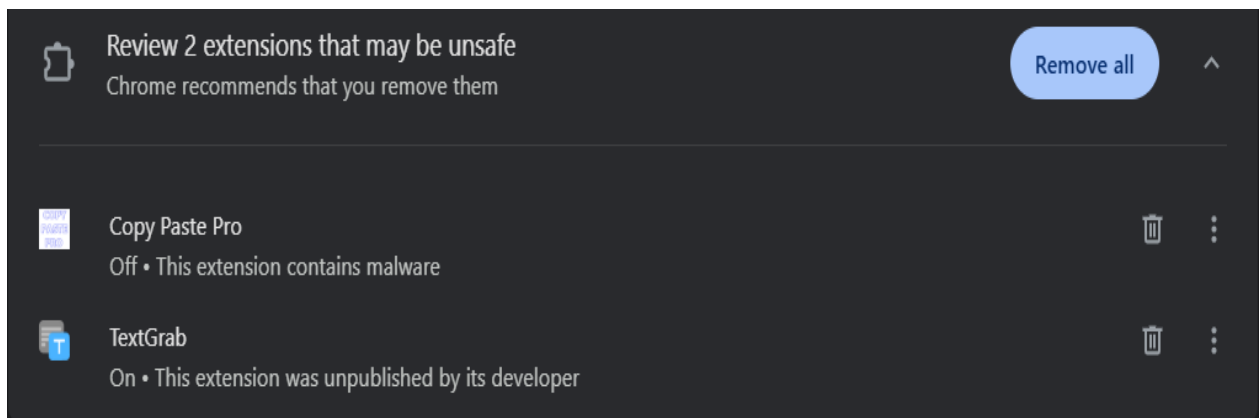

## 1. Chrome browser Extensions Installed:

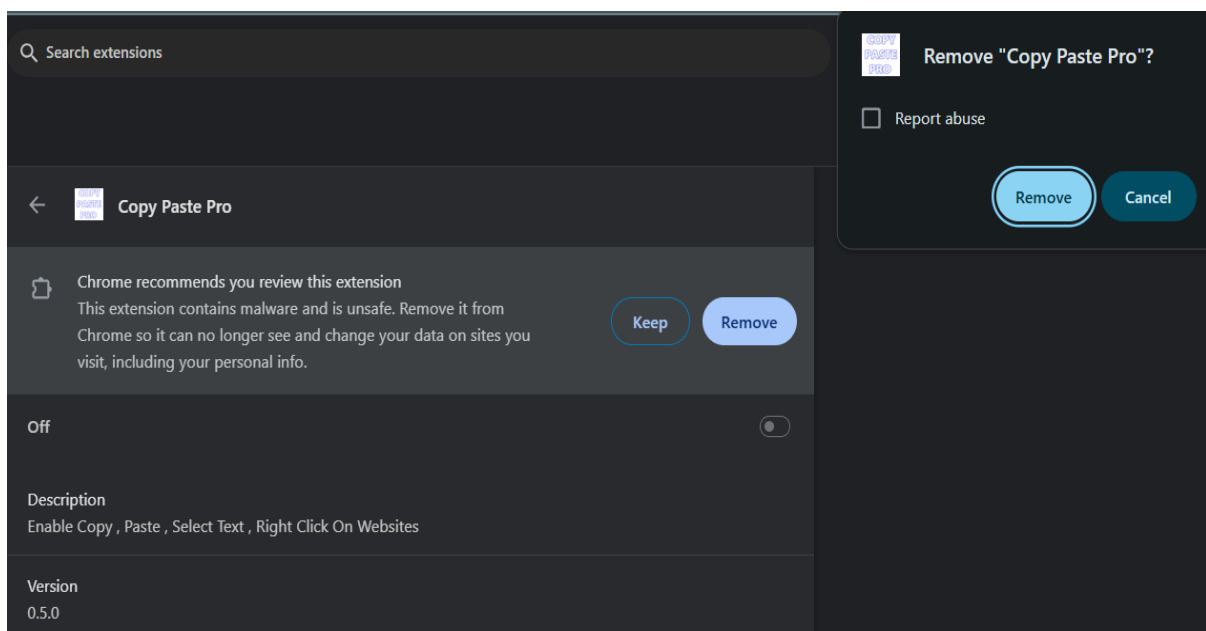

## 2. Reviewing Google drive App. Launcher Extension:

### 3. Malicious or unused Extensions:

### 4. Removing Suspicious Extensions:

### 5. Effects of Harmful Malicious Extensions:

- They can steal sensitive user data, including browsing history, authentication credentials, and private information, without the user's knowledge.
- Extensions can also slow down devices and wear out hardware components.
- Malicious extensions can grant attackers persistent access to user sessions, enabling data theft, impersonation, and potential entry into corporate environments
- Malicious extensions can inject affiliate links into webpages, allowing the extension owners to profit from the user's browsing history.
